Number of coats: 2 – 4

Flash-off between coats: 10-15 min. This time is indicative and will vary depending on application, spraygun set up, film thickness and the hardeners and thinners used. As a general rule observe the partial matting of the paint film before applying the following coat.

Film thickness: 50 μ

Theoretical coverage: 1 l mixture = 8 m² at 50 μ

1 kg mixture = 8.1 m² at 50 μ

V.O.C. (on average) of the product ready for use: ~ 570 g/l

DRYING TIME

Flash-off at room temperature: 10 – 15 min. at least

Low baking: 40 min. at 80°C or
90 min. at 60°C

Drying at lower temperatures is not recommended.

NOTE

Higher film thickness than 50 μ increases the soft-touch effect.

Colour formulations containing base colours 29044 and 29046 must be ONLY used on paint substrates NOT directly exposed to sunlight.

In case of substrates exposed to sunlight, use alternative formulations (High Resistance or Ecological Formulations) available on Lechler Explorer.

The use of UV Plus Additive 33333 (up to 5% in the topcoat) allows you to further improve resistance to sunlight.
