To accelerate the product hardening in cold conditions add 09167 SPEED-O-DRY ADDITIVE (max 5%). The product can be applied with electrostatic units.

In the Lechsys tinters range there are average resistance and lower priced tinters such as 29016-29023-29046-29044 normally used to formulate colours linked to the binder 29145.

To achieve higher colour durability without changing the binder, see recommended alternative tinters indicated in the Lechsys user handbook available on the Internet.
